AL-UPVC SMART DOOR LOCK

The Ottoclick Smart Door Lock is a next-generation security solution, specially engineered for aluminium and uPVC doors, where conventional smart locks often fail to fit seamlessly. Designed with a sleek, slim profile, it ensures perfect compatibility without heavy modifications, making it ideal for modern homes, offices, and premium interior projects.

Equipped with 6 advanced unlocking methods – Fingerprint, PIN Password, RFID Card, Mobile App, Bluetooth, and Manual Key – this lock delivers the perfect blend of convenience, security, and luxury living. Whether it's keyless access for daily use or remote control via smartphone, it enhances the overall smart home experience.

Its easy installation mechanism allows quick integration into existing door systems, making it highly preferred by interior designers, fabricators, and builders. Built with robust materials and intelligent technology, it ensures reliable performance, enhanced safety, and long-term durability.

- Power Supply: 220 V - 240 VAC
- Motor Power: 24 V AC/ 120 W
- Force: 1200N
- Max Door Area: 16 Sqm
- Running Speed: 12-15 cm/s
- Remote Distance: $\geq 30\text{m}$
- Maximum Recording of Transmitter: 25 Nos
- Working temperature: $-20^{\circ}\text{C} \sim +50^{\circ}\text{C}$

Door Sheet Specifications-

- Panel Type: Pre- Painted Galvalume Finger Safe 40mm Thickness.
- Pu Infill (Polyurethane) Panel, With 0.4mm
- Outer And 0.4mm.
- End Caps: Galvanized Finish
- Shaft: Tubular Shaft System.
- Drums: Std Lift Drums.
- Track: Galvanized Vertical & Horizontal
- Strengthening Profile: Above 5mtr Door
- Quality & Safety: Tuv & Ce Certified, Manufacturing Accordance With En 13241-1

AUTOMATED DOOR MOTOR

Powerful, reliable, and engineered for smooth performance, Ottoclick Door Arm Motors are designed to automate swing and garage doors with ease. Available in variants supporting 300 KG to 600 KG pulling capacity, these motors ensure effortless operation even for heavy-duty doors. Built with advanced safety features, durable construction, and intelligent control options, they deliver a perfect blend of strength, convenience, and long-term reliability for residential, commercial, and industrial applications.

Technical Specifications-

- Available in 300 KG, 400 KG, 500 KG & 600 KG Capacity
- High-Torque Motor for Heavy-Duty Performance
- Smooth & Silent Operation
- Remote, Mobile App & Smart Control Compatible
- Auto Stop & Obstacle Detection Safety Features
- Weather-Resistant & Durable Construction
- Suitable for Residential, Commercial & Industrial Doors
- Low Maintenance & Long Service Life

AUTOMATED SLIDER MOTOR

Engineered for strength and precision, Ottoclick Door Slider Motors are designed to automate heavy sliding gates with ease. Available in 800 KG to 1500 KG pulling capacities, these high-performance motors deliver smooth, reliable, and secure operation for residential villas, commercial properties, factories, warehouses, and industrial entrances. Built with robust components and intelligent safety features, they ensure long-lasting performance even under demanding conditions.

- Heavy-Duty Gear Drive Mechanism
- Smooth & Silent Sliding Gate Operation
- Remote, Mobile App & Smart Access Control Compatible
- Auto Stop & Obstacle Detection Safety System
- Weatherproof & Durable Construction
- High Torque Motor for Continuous Performance
- Suitable for Residential, Commercial & Industrial Gates
- Low Maintenance & Long Service Life

SWING WHEEL DOOR MOTORS

Experience powerful and innovative gate automation with Ottoclick's Wheel-Based Swing Gate Motors. Designed for large and heavy swing gates, these systems utilize a high-traction motorized wheel mechanism that eliminates the need for conventional arm motors. With a payload capacity of up to 500 KG per gate leaf, the system ensures smooth movement, superior grip, and reliable performance even on uneven surfaces. Equipped with premium high-grip tyres, intelligent controls, and advanced safety features, it is the perfect solution for luxury residences, commercial premises, industrial facilities, and farmhouse entrances.

- High Load Capacity**
Supports gate leaf up to 500KG
- High Grip Drive Wheel**
Superior traction for smooth operation
- Strong & Durable Build**
Built for long life & heavy usage
- Auto Lock Function**
Secure locking when gate is closed
- Smooth & Quiet Operation**
Advanced technology for silent performance
- Weather Resistant**
Designed to withstand all weather conditions
- Easy Manual Override**
Manual key release in case of power failure
- Wide Voltage Range**
Stable performance in fluctuating voltage

SLEEK & COMPACT DESIGN
Stylish look that blends with premium gates

HIGH GRIP DRIVE WHEEL
Strong grip for smooth & stable movement

WEATHER PROOF
IP55 rated protection for outdoor use

MANUAL RELEASE KEY
Easy manual operation in any situation

Technical Specifications-

- Supports Swing Gates up to 500 KG Payload Capacity
- High-Grip Industrial Tyres for Maximum Traction
- Ideal for Large & Heavy Gates
- Smooth, Stable & Silent Operation
- Remote, Mobile App & Smart Access Control Compatible
- Obstacle Detection & Auto-Reverse Safety Function
- Weatherproof Design for Outdoor Applications
- Low Maintenance & Long Operational Life
- Suitable for Residential, Commercial & Industrial Entrance
